

JTC TOKEN

Smart Investment.

Project Overview

The project Java Times Caffé has intended to change the coffee business in the world through innovation, vision, and applied technology. By opening an enormous number of cafés worldwide where we want to see each individual as a piece of the Coffee Industry and the innovation-driven Coffee Shop Chain. It is a worldwide project with a base in Mexico. Java Times Caffé has collected exchanging associations with more than 12 expresses that produce coffee worldwide and have a solid front activity that can rival any coffee chain.

It is a blockchain-based platform intended to put resources into the biggest worldwide coffee project for the circulation of share investment for every Java Times Caffé's accomplice. The task is upheld by Java Times Caffé where you will want to get to and make profoundly productive investments through JTC Tokens. Tokens Will be utilized to develop the project Java Times Caffé' and grow to different areas of the world. This one Token will meaningfully have an impact on how you view retail coffeehouses.

For the further improvement of our business, we are using propels that consolidate the use of Artificial Intelligence, information investigation of everyday errands to update processes, be more successful and give the most fulfilling client experience and blockchain-based system for the course of offer investments for each Java Times Caffé' accessory. Also, we will utilize an in-house blockchain Proof-Of-Stake (PoS) technology and will design applications to deal with our venture.

Investors should place assets into the Java Times Caffé' since we have north of 30 years of contribution to the coffee business. We produce the best quality coffee, customer service, and excellent opportunities for our employees with top-notch personalized service while offering phenomenal coffee services at a pocket- accommodating cost to our esteemed clients. Java Times Caffé' won't just act as a stage for development and extension but also as a preparation office for staff, future chiefs, franchisees, and administrators. Purchasers give increasingly more consideration to the quality, planning, and attributes of coffee. Java Times Caffé' is an esteemed brand that is driving the area of specific coffeehouses, where the best high height coffee in Mexico has been served beginning around 1999 but now the whole world will have a taste of it.

Our test is to execute the endeavor we expected for the world and open 3000+ Java Times Caffé' in the accompanying five years and disclose Java Times Caffé as a primary brand in the world. Over time, investors would be compensated with the expanded measure of JTC Tokens and be a piece of 3000+ new Java Times Caffé' simply by contributing and investing, which you will begin to recuperate extremely quickly just after the principal stockpiles up.

Problem

The issue that the world is confronting today in this period of technology is that no cryptographic money is upheld by any famous, driving, and physical brand. Thus, this concludes that brands are not working behind any cryptocurrency or supporting any digital currency. The other famous brands available in the market are not contributing to this advancement, inventive system, and are not performing any transactions through cryptocurrency.

The other brands are not aware of these modern and advanced methods, techniques, and innovative ideas that lead to success path. The improvement cycle through blockchain innovation makes a close impact in each city around the world but unfortunately, other brands are not using this technology. Different brands are not using blockchain development to assist their clients, investors, staff, and the brand.

Our Solution

We have promoted and planned an innovative model of Java Times Caffé' that decentralizes the development of new branches through the headway of new coffee cafes using investments. This creative and innovative mix of advancement, blockchain, and the well-known driving brand Java Times Caffé's modern and advanced augmentation creates a close outcome in each city worldwide. They said it right that extraordinary thoughts and great ideas start with coffee. Java Times Caffé is a perfect place to gather, work, and drink with the feeling of comfort and relaxation.

We have built a solid reputation by offering quality products. Java Times Caffé' gives the most remarkable and satisfying client experience and blockchain-based system for the circulation of share investment. Our brand Java Times Caffé' provides awareness to individuals about blockchain innovation. It helps them create, grow, adapt to modern changes, and develop their abundance through feasible investments in our JTC tokens, which increases the market capital of blockchain and the utility of blockchain technology.

Market Opportunity

Java Times Caffé' is focused more on its franchise growth worldwide and innovative product to achieve long-range business goals. Java Times Caffé' will take special care of clients' requirements which results in ultimately advancing its monetary position and ruling the piece of the pie in the market. In the beginning phases of coffee market advancement, target markets were to be princely, middle-class supporters. Over the long run, industry-wide statistical surveying groups have perceived the new audience in the market as more youthful, and in a lower level of pay than their more settled clients. Regardless, the first target market has not vanished however has ventured into the segment for each storage area.

Reports showed that the number of coffee consumers has turned into the market's valuable source of development. Java Times Caffé' provides the best quality in every product they provide. Java Times Caffé' has a solid balance of best products and a blockchain-based technology project with the desire to extend that strength worldwide and into commercial centers and real-estate business. Java Times Caffé's workers are a vital piece of the organization's prosperity by which the worker pridefulness leads to client happiness and market power.

Java Times Caffé's shares are competitive and based on the cost-plus pricing strategy. The share rates and prices of the JTC token might be modified by factors such as supplier pricing and market position. Our product will undoubtedly offer gigantic worth to our clients by giving larger than average servings prepared with the highest quality ingredients. Our products are bound to provide tremendous value to our customers. Once the funding and investments are in the process, the transactions will be publicly visible. JTC tokens are generated as a means of exchange or reward granting rights to investors, similarly to shareholders.

How it works

Java Times Caffé is an overall innovative and blockchain-based technology project and has gathered trading relationships with more than 12 communicates that produce the world's best coffee and have a strong front movement that can equal any coffee chain. For the further development of our brand Java Times Caffé', we utilize moves that combine artificial intelligence, cryptocurrency, and data examination of regular tasks to refresh processes, find success and give the most gratifying client experience.

It is a blockchain-based stage expected to place assets into the famous coffee project Java Times Caffé for the flow of offered

investments for each Java Times Caffé associate. The errands to run by Java Times Caffé are where you invest and make significant speculations wisely in JTC Tokens. Tokens will contribute to the development, growth, and establishment of the brand Java Times Caffé worldwide in various regions of the world. This one JTC token will seriously affect how you view retail cafés. Java Times Caffé was built to sway the existence of thousands of individuals, assisting them with creating, developing, and increasing their living standard of life through investments. Java Times Caffé won't simply go about like a phase for advancement and expansion but in addition as an enthusiastic workspace for staff, future bosses, franchisees, and investors.

The Java Times Caffé's consistent planning of opening 3000+ coffee stores in the accompanying five years made Java Times Caffé a vitally open brand, with the creative contemplations and blockchain advancement using JTC Token's speculation. Our objective is to execute the investments we planned. Investors will contribute to our mission since we are energetic about advancements and we are the future leading brand. Later investors will be rewarded in the form of tokens. We introduced this cryptocurrency, JTC tokens for the investors to invest in these tokens. We will utilize one part of the tokens to put resources into land advancements and real-estate business, and open new coffeehouses worldwide. We aim to open 3000+ stores making Java Times Caffé a national brand. Investors don't need to go through any struggles or need to pay sways or brand the leader's demands. Investors will have an incredible opportunity to have a portion of 3000+ branches where their digital currency as an investment, JTC tokens will work.

What Sets us Apart

We have developed an inventive, innovative, and advanced system Java Times Caffé which works on the principle that decentralizes the advancement of new coffee branches through investments in JTC Tokens. The undertaking was framed with the arrangement to change the Coffee business in "México" and the other world through creative thoughts, innovative ideas, methods, techniques, and applied technology. Our investors won't just turn into a piece of this tremendous coffee Industry however can likewise partake in this innovation-driven coffee shop chain.

The planning of opening 3000+ new coffee stores in the accompanying five years with the inventive thoughts and blockchain innovation utilizing JTC Token's investment is the uniqueness of our venture Java Times Caffé. The development process through blockchain technology creates a nearby effect in every city where you can be essential for 3000+ new cafes. By contributing with \$ 0.0001 USDT per token, you will begin to recuperate extremely rapidly just after the coffee cafe accumulates up and investors will win the reward in the form of the tokens and token increased worth.

Stake for a 12 MONTHS OR MORE and you get free tokens from the profits

Stake for a 6 TO 12 MONTHS and you get free tokens from the profits

Example if profits are 1000000 dls in a year's period the million worth of tokens Will be transferred to all token holders if the million dls equals to 39% you get 19.5% value on the top of all your token staked for a At least 6 Months

Stake for a 3 TO 6 MONTHS and you get free tokens from the profits

Example if profits are 1000000 dls in a year's period the million worth of tokens Will be transferred to all token holders if the million dls equals to 39% you get 9.75% value on the top of all your token staked for a At least 3 Months

We will utilize one part of the tokens to put resources into land advancements and real-estate business, open new coffeehouses worldwide, and conveyance. The token holders that like to be a part of this development process and want to have these benefits of Java Times Caffé need to hold their tokens for some duration. Meanwhile, the development process will grow. Later, the shares, profits, tokens, and rewards will be distributed and divided among the shareholders and investors.

Business Model

Our Business Model is intended to affect the existence of thousands of individuals, assisting them with creating and developing their abundance through reasonable investments. We planned an inventive model that decentralizes the improvement of new branches through the advancement of new branches through crowdfunding. This altogether affects the region where each branch was opened. This creative blend of innovation and the famous Java Times Caffé's intelligent extension through technology produces a nearby effect in every city.

For the development of our business, we are utilizing advances that incorporate the utilization of Artificial Intelligence, data analysis of day-to-day tasks to upgrade processes, be more effective and give the most satisfying client experience and blockchain-based framework for the circulation of share investment for every Java Times Caffé' accomplice. Investors ought to put resources into the Java Times Caffé's since we have over 30 years of involvement with the coffee business and we give quality to each item we provide.

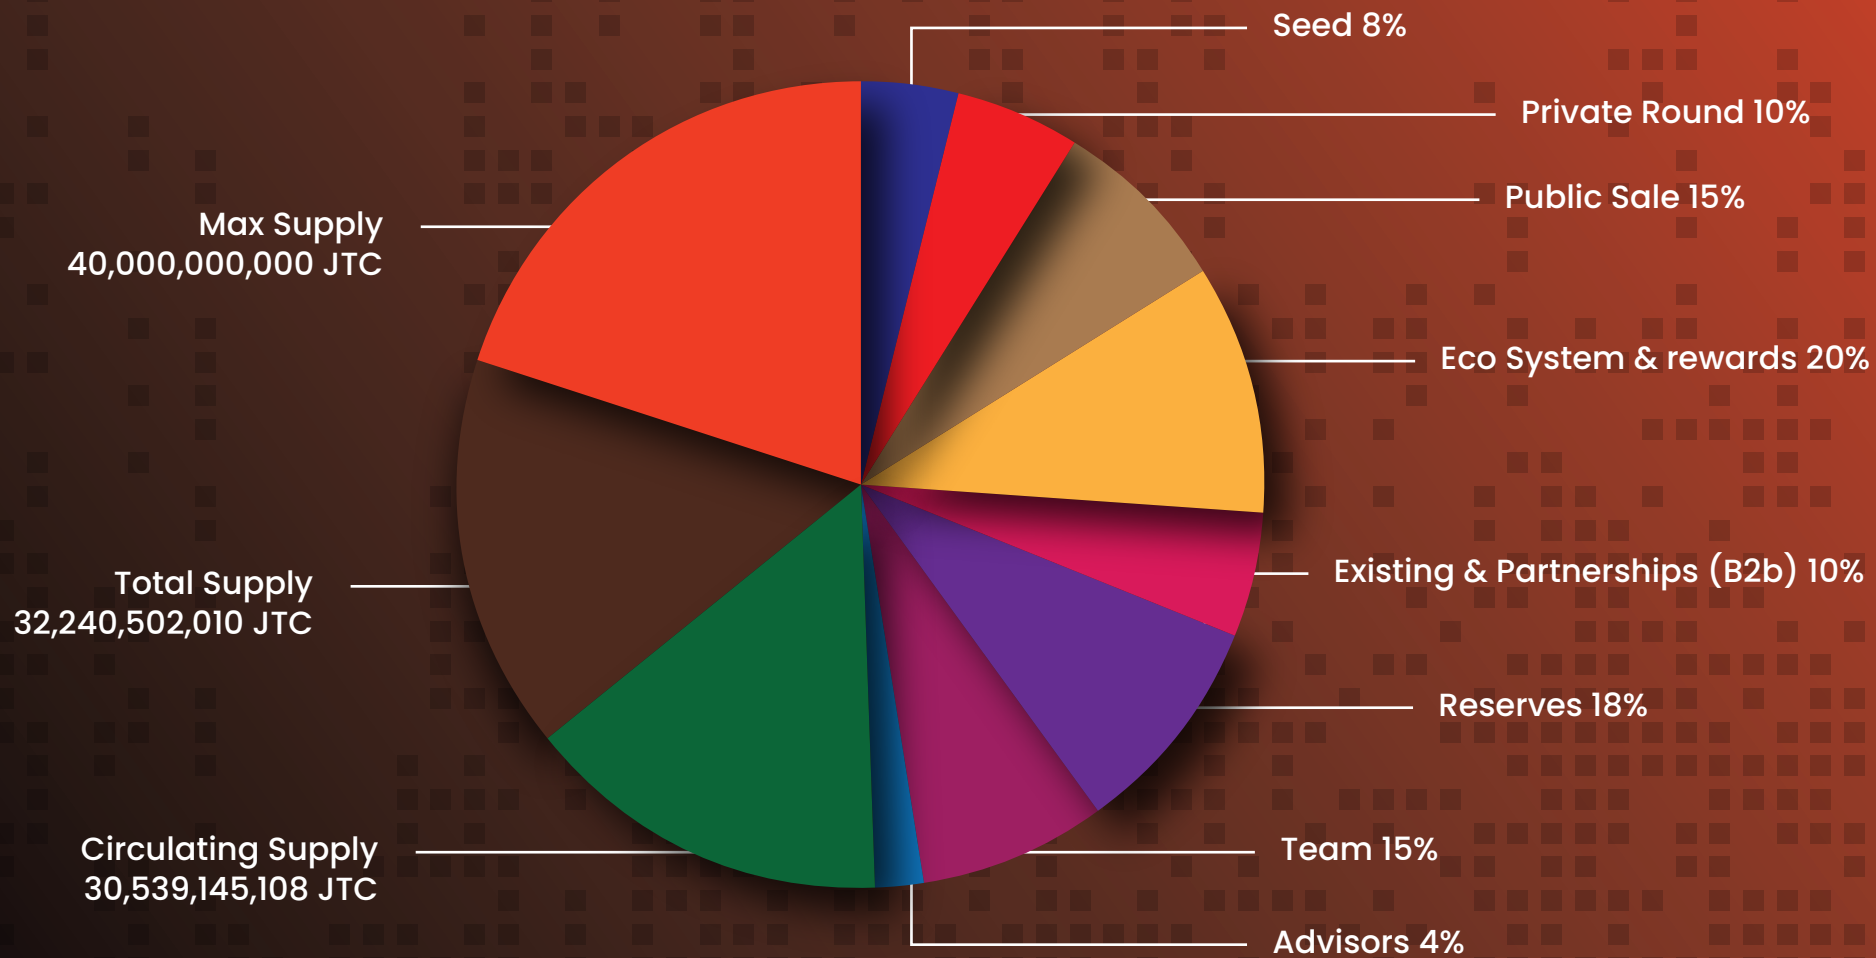

We chose Mexico as a beginning district due to the solid and enormous coffee cultivation in the 12 different states of the country. We likewise are venturing into the accompanying nations in the subsequent stage: Bolivia, Brazil, Ecuador, Perú, Dominican Republic, Haiti, Colombia, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama, and Venezuela. Some coffee makes more than its financial worth. We mean to produce multiple thousand direct positions in Mexico and aid public coffee cultivators to acquire a more attractive cost for their work an uncountable number of cups of coffee, and numerous learnings. Reasonable and affordable investment for all where many individuals in a similar city contribute 3000 + Java Times Caffé Shops.

Our challenge is to execute the venture we intended for the world and open 3000+ stores in the following five years and make Java Times Caffé a main public brand. Financial backers ought to contribute since we are enthusiastic about innovation and the flavor of a decent coffee. Additionally, we will utilize an in-house blockchain Proof-Of-Stake (PoS) technology. Later, we will design applications to deal with our project Java Times Caffé'. You as an investor don't have to give your time or exertion, don't have to spend to obtain an establishment or need to pay sovereignties or brand the executive's charges even then you will be able to add to the improvement of society, work creation, monetary development and would be rewarded with the increased amount of JTC Token. Today you have a great chance to become a part of 3000+ branches of coffee shops where your cash will work for you, consistently.

Team

We have an extensive experience of 35 years in the coffee Industry. We are the master in cafeteria operations and training key personnel for the coffee shop operations. This success is a reward that is granted to Java Times Caffé's team which had a crucial impact in forming the Java Times Caffé's into what it is today, giving a system and platform to invest in JTC Tokens. They showed continuous improvement and assisted with guaranteeing the drawn-out outcome of the Java Times Caffé's project. The incredible work done by our team brings about contacting a more extensive crowd and stirs more prominent interest in Java Times Caffé'.
